### **DETAILED ACTION**

The amendment and remarks filed on 09/02/03 have been acknowledged and entered.

Claims 1-18, and 20-28 are pending.

The objections to the abstract and the title have been withdrawn in view of applicants' amendment.

The rejection under 35 U.S.C. 112, second paragraph stated in paper No. 13 has been withdrawn in view of applicants' amendment.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8-9, 11-18, and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berbel or Matthews.

Claims 7, 10, 20, and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berbel or Matthews as applied to claims 1-6, 8-9, 11-18, and 21-24 above, and further in view of Li and Squires et al.

These rejections stated in paper No. 13 are maintained.

### ***Response to Arguments***

Applicant's arguments filed 09/02/03 have been fully considered but they are not persuasive. Applicants argue that there is no disclosure in Berbel to remove contaminants on the surface using two fluids, applicants also argue that Matthews reference does not teach removing contaminants particles from the surface. Applicants' arguments are unpersuasive because removing organic material from semiconductor wafers, and drying objects by removing liquid particles from a surface are functionally equivalent to removing particles from a surface of a substrate. This is also because removing liquid from a surface will include removing any residues with the liquid from said surface .

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
